(54) Title: **CYCLIN DEPENDENT KINASE 5 PHOSPHORYLATION OF DISABLED 1 PROTEIN**

(57) Abstract: The present invention is based on the discovery that the Disabled 1 protein (Dab1) is a substrate for Cdk5 activity, and is selectively phosphorylated by Cdk5. An assay to determine Cdk5 activity by detection of Dab1 phosphorylation on serine amino acids that are selectively phosphorylated by Cdk5 is provided. The invention further provides an antibody and screening kit to determine Cdk5 activity, a method for detecting a neurological disorder by determining Cdk5 activity, a method of screening for compounds that increase or decrease Cdk5 activity and a method for treating a neurological disorder with such a compound.

## A. CLASSIFICATION OF SUBJECT MATTER

IPC(7) : C12Q 1/48

US CL : 435/15

According to International Patent Classification (IPC) or to both national classification and IPC

## B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)  
U.S. : 435/15

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)  
MEDLINE, CAPLUS, AGRICOLA, EMBASE, BIOSIS, WPIDS, EAST

## C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.

☐ Further documents are listed in the continuation of Box C.

☐ See patent family annex.

\* Special categories of cited documents:

"A"	document defining the general state of the art which is not considered to be of particular relevance	"T"	later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
"E"	earlier application or patent published on or after the international filing date	"X"	document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
"L"	document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)	"Y"	document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
"O"	document referring to an oral disclosure, use, exhibition or other means	"&"	document member of the same patent family
"P"	document published prior to the international filing date but later than the priority date claimed

## INTERNATIONAL SEARCH REPORT

PCT/US03/01463

### BOX II. OBSERVATIONS WHERE UNITY OF INVENTION IS LACKING

Group I, claim(s) 1-15, 22-25 and 31, drawn to methods of detecting Cyclin dependent kinase 5 (Cdk5) activity "in vitro" or "in vivo" using Disabled 1 protein (Dab1).

Group II, claim(s) 16-19, drawn to methods of identifying modulators of Cdk5.

Group III, claim(s) 20-21, drawn to methods of treatment using said modulators.

Group IV, claim(s) 26-30, drawn to antibodies which bind Dab1 only when it is phosphorylated by Cdk5 and kits comprising said antibodies.

The special technical features of Groups I, II and IV, which are methods of use of Cdk5, methods of use of modulators of Cdk5 and antibodies, respectively, share nothing in common because each method of Group I-II have different steps and use different products and have a different final goal. Similarly, the invention of Group IV shares no special technical feature with any of said methods because said methods do not employ or produce antibodies. Groups II and III share a common special technical features but said invention are not required to be rejoined under PCT Rule 13.1, because Group II invention already has a method of use of modulators.

### Box I Observations where certain claims were found unsearchable (Continuation of Item 1 of first sheet)

This international report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claim Nos.:  
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☐ Claim Nos.:  
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
3. ☐ Claim Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

### Box II Observations where unity of invention is lacking (Continuation of Item 2 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:  
Please See Continuation Sheet

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☒ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: 1-15, 22-25 and 31.

Remark on Protest

☐  
☐

The additional search fees were accompanied by the applicant's protest.

No protest accompanied the payment of additional search fees.
